BRIGHT OPTIC: Double parabolic V-Shaped reflectors made of pure aluminium polished and anodized with a high specular MIRO-4 finish. This anti-iridescent optic renders a "DARKLIGHT" effect and a homogeneous light projection. Renders high performance and low luminance level cut-off at $60^\circ < 200\text{cd/m}^2$.

MAT OPTIC: Same as above but in mat finish that renders soft brightness (model N/MR). Four metal springs are included in all louvres for hanging the louvre for easy tubes replacement and maintenance.
